OCT 11 1991

IOWA SECTION

To Whom it May Concern;

I am writing as a concerned citizen for my community. I am employed at a collision center in Iowa, and I am aware of all the rules and regulation in regards to hazardous waste removal and disposal. Recently I heard an employee of a company in the same town and same type of business talk about how, at his company their waste sit around in five gallon buckets and every now and then they just happen to disappear. I thought this was rather strange with all the rules the EPA has to follow and the mailing of the manifest forms. I just can't believe someone can get away with this, if they are. I am writing so you are aware of this company and that if there is any wrong doing, it will stop. This company is:

PRODUCT DESIGN AND FABRICATION, INC.  
6700 6th Street S.W.  
Cedar Rapids, Ia 52404  
(3139) 365-4619

Usually I would not bother with other peoples doings, but when it will effect me and my family in the long run then I will take stand. I do not see why innocent people will have to pay for the ignorance of others. If they only know what this does to our community, now and in the future. I would like my son to be able to grow up in a clean world, and be able to breathe clean air. Thank you for your attention and concern in this matter, I hope that someone with authority will take this matter a little farther and get this settled.

Sincerely,

Ex. 7(c)
